

CALL FOR PAPERS

ICICSA 2021
Jul 12-13, 2021
Ottawa, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICICSA 2021 : International Conference on Industrial Control Systems and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Industrial Control Systems and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Industrial control systems	Control system security
Distributed control system (DCS)	Defensive architectures for cybersecurity of safety systems
Supervisory control and data acquisition (SCADA)	Cyber security defense techniques
Programmable logic controller (PLCs)	Industrial control system and cybersecurity
Control theory and engineering	Industrial control systems security assessments and audits
Computational intelligence and applications	Hardware security solutions
Communications and network protocol security in control systems	Encryption, authentication, availability assurance
Control system configurations	Resilient systems
Programmable logic controllers	Application security
Pneumatic control systems	Secure firmware
Industrial sectors and critical infrastructures	Timing vulnerabilities in RT-control systems
Control devices, local operations, and sensor systems	Security implications of feature interactions
Embedded control, Automation, and industrial safety systems
