

# CALL FOR PAPERS

**ICSGBA 2021**  
**Jul 12-13, 2021**  
**Ottawa, Canada**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSGBA 2021 : International Conference on Sedimentary Geology and Basin Analysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Sedimentary Geology and Basin Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Sedimentary geology  
Sedimentary geology, geomorphology,  
and paleontology  
Modern sediments and ancient  
sedimentary rocks  
Fundamental materials, features,  
and processes  
Textures of siliciclastic sediments  
and sedimentary rocks  
Particle size, particle shape, and  
particle packing  
Mechanics of sediment transport  
Survey of siliciclastic sedimentary  
rocks  
Sandstones, conglomerates and  
shales  
Carbonate sediments and sedimentary  
rocks  
Siliciclastic and carbonate  
diagenesis  
Paleontology, with special  
reference to fossils in sedimentary  
rocks

Modern and ancient depositional  
environments  
Modern and ancient sedimentary  
environments  
Sediment fluxes  
Sediment-organism interaction  
Sequence stratigraphy  
Stable isotope geochemistry  
Environmental sedimentology  
Geology of oil and natural gas  
Petroleum exploration and  
development  
Basin modeling and reservoir  
evaluation  
Geochemical and geophysical studies
