

CALL FOR PAPERS

ICEDEE 2021
Jul 19-20, 2021
Paris, France

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEDEE 2021 : International Conference on Electromagnetic Devices and Electrical Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Electromagnetic Devices and Electrical Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Electromagnetic devices	Technological inaccuracy in the performance of small electrical machines
Electromagnetic devices for motion control	Magnetic transmission line
Electromagnetic devices for signal processing	Motor drive circuits
Linear motion electromagnetic devices	Theory of precise sinusoidal windings
Computer field models of electromagnetic devices	Induction ferromagnetic core position sensors
Numerical modelling of electromagnetic devices	Spherical ac electro-machine system as free gyro instruments
Development and application of electromagnetic devices	Electro-magnetic strip transmission line devices
Generalized AC machines for the design of motion control devices
