

CALL FOR PAPERS

ICPESGE 2021
Jul 22-23, 2021
Rome, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICPESGE 2021 : International Conference on Power, Energy and Smart Grid Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Power, Energy and Smart Grid Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Green energy
Advances in green energy technologies
Advantages and disadvantages of green energy
The future of green energy systems
Renewable energy
Biofuels
Bioenergy
Green technology
Energy conservation
Sustainable energy policies
Green economy

Energy and environment
Nano environmental technologies
Bioremediation
Vehicular electronics and telematics
Sustainable development
Energy storage and management
Power electronics and energy conversion
Health monitoring
Microgrid, smart grid, cloud systems
Smartmeters, electronic for transmission technologies
Embedded and autonomous systems
