

CALL FOR PAPERS

ICFEFS 2021
Jul 22-23, 2021
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICFEFS 2021 : International Conference on Forecasting Economic and Financial Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Forecasting Economic and Financial Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Data preprocessing methods
Data decomposition methods
Seasonal adjustment methods
Detrending methods
Turing point detection methods
Direct filter approach
Empirical mode decomposition
Singular spectrum analysis
Forecasting models
Econometric models
Time series models
Artificial Neural Networks

Evolutionary Algorithms
Swarm Intelligence
Rough Sets and Fuzzy Systems
Kernel based Learning and SVM
Bayesian models
Forecasting theory
Forecasting adjustment
Ensemble forecasting
Model integration
Forecasting performance evaluation
Interval forecasting
