

CALL FOR PAPERS

ICWHMS 2021
Jul 22-23, 2021
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWHMS 2021 : International Conference on Wireless Health Monitoring Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Wireless Health Monitoring Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Wireless health monitoring systems
Real time wireless health
monitoring application using mobile
devices
Automatic wireless health
monitoring system
Design and implementation of
wireless patient health monitoring
Image processing
Computer-aided diagnosis
Image-guided procedures, robotic
interventions, and modeling

Image perception, observer
performance, and technology
assessment
Digital pathology
Pediatric imaging
Thoracic imaging
Molecular imaging
Musculoskeletal imaging
Computerized medical imaging and
graphics
