

CALL FOR PAPERS

ICIPERH 2021
Jul 29-30, 2021
Zurich, Switzerland

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICIPERH 2021 : International Conference on Intertrial Priming and Episodic Retrieval Hypothesis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Intertrial Priming and Episodic Retrieval Hypothesis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Intertrial priming in cognitive psychology
Top-down and bottom-up attention
Integrative framework
Measuring the effects of intertrial priming
Blocked and mixed trials
Cueing and cue validity effect
Pop-out search and conjunctive search

Visual consciousness and intertrial feature priming
Dimension-weighting account theory
Dimension-specific intertrial priming effects
Priming of pop-out hypothesis
Episodic retrieval hypothesis
Perceptual grouping of distractors account
