

CALL FOR PAPERS

ICCCFWSMC 2021
Aug 09-10, 2021
Lagos, Nigeria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCCFWSMC 2021 : International Conference on Cooperative Communications for Future Wireless Systems and Multicell Cooperation is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Cooperative Communications for Future Wireless Systems and Multicell Cooperation. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Interference coordination schemes
Cell-free massive MIMO system
Massive MIMO and millimeter-wave communication in the context of cooperative networks
Multicell cooperation (centralized joint processing, distributed processing, etc.)

Cooperative interference alignment approaches
Relay assisted schemes
Cooperative physical layer security
Cooperative non-orthogonal multiple access schemes
