

CALL FOR PAPERS

ICNDGT 2021
Aug 09-10, 2021
Lagos, Nigeria

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNDGT 2021 : International Conference on Natural Disasters and Geospatial Technology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Natural Disasters and Geospatial Technology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geospatial technologies and techniques for natural hazards
Global positioning systems in management of natural hazards
Remote sensing technologies in management of natural hazards
Geographic information systems and natural hazard management
Geospatial data and information for natural hazard management
Geoinformatics applications in disaster management
Monitoring an mapping of natural hazards and geomatics
Spatial data infrastructure for natural hazards and geomatics
Risk management and mitigation of natural hazards and geomatics

Risk vulnerability and early warning of natural hazards and geomatics
Multi-hazard risk assessment and geomatics
Multi-vulnerability risk assessment and geomatics
Risk quantification and geomatics
The economic aspects of hazards
Geovisualization and communication techniques for risk management
Natural hazards assessment and disaster risk management
Global scale hazard assessment
