

CALL FOR PAPERS

ICGMC 2021
Aug 05-06, 2021
Montreal, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGMC 2021 : International Conference on Green Materials Chemistry is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Green Materials Chemistry. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Green materials chemistry
Energy and sustainable materials
Characterization methods of nanomaterials, photovoltaic materials and systems
Materials chemistry for energy
Energy, materials and chemistry
Chemical engineering applications for clean energy
Computational modelling of materials for the nuclear industry
Green materials chemistry in developing areas
Green materials chemistry for engineering applications
Scope and applications in pharmaceutical chemistry
Scope and applications in physical chemistry
Scope and applications in organometallic chemistry

Scope and applications in electrochemistry
Scope and applications in cluster chemistry
Scope and applications in clandestine chemistry
Scope and applications in amateur chemistry
Scope and applications in click chemistry
Scope and applications in cosmetic chemistry
Scope and applications in petro chemistry
Scope and applications in regenerative chemistry
Chemical kinetics of materials
Insilico chemical assessment
Scope and applications in combinatorial chemistry
Scope and applications in green chemistry
