

CALL FOR PAPERS

ICCSM 2021
Aug 12-13, 2021
Venice, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSM 2021 : International Conference on Computer and Software Modeling is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computer and Software Modeling. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

AI and Knowledge based software engineering
Parallel and Distributed Computing
Artificial Intelligence
Patterns and frameworks
Aspect-orientation and feature interaction
Pattern recognition and analysis
Business Process Reengineering & Science
Process Management & Improvement
Communication Systems and Networks
Component-Based Software Engineering
Program comprehension and visualization
Computer & Software Engineering
Programming languages

Computer Animation and Design
Contents
Reengineering, Reverse Engineering
Computer Game Development, User Modeling and Management
Reliability Modeling and Analysis
Computer supported cooperative work
Requirements Engineering
Cost Modeling and Analysis
Reverse engineering and maintenance
Data Mining and Knowledge Recovery
Safety and Security Critical Software
Design & Process Engineering & Science
Signal Identification
Design Patterns and Frameworks
