

CALL FOR PAPERS

ICDSPMME 2021
Aug 12-13, 2021
Venice, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDSPMME 2021 : International Conference on Digital Signal Processing Methods and Mechatronics Engineering is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Digital Signal Processing Methods and Mechatronics Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Digital signal processing for
mechatronic applications
Principles and algorithms
Digital signal controllers in
mechatronics
Algorithms for digital signal
processing
Digital signal processing methods
suitable for mechanical systems
Sensors and digital signal
conditioning in mechatronic
systems
Discrete-time signals and sampling

Continuous-time signals
Digital filter design
Digital control design
Random signals and spectral
estimation
Random signal processing
Spectral representation
Linear filters
