

CALL FOR PAPERS

ICECENM 2021
Sep 16-17, 2021
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICECENM 2021 : International Conference on Electronic Cybernetics Engineering and Numerical Methods is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Electronic Cybernetics Engineering and Numerical Methods. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Electronic cybernetics engineering
Cybernetics engineering
Electronic technology and cybernetics
Selection and adaptation of self-sufficient systems
Mathematical foundations for engineering
Programming methods
Systems and circuits
Electronic devices and telecoms
Control and measurement
Neurocomputation
Signals and telecoms
Machine intelligence
Numerical methods

Dynamics
Digital electronics
Electric circuits
Electricity and magnetism
Probability and statistics
Operating systems
Signals and systems
Algorithm design
Analogue electronics
Microcontrollers and embedded systems
Electronic instrumentation
Computer networks
Interface design
