

CALL FOR PAPERS

ICCB 2021
Sep 06-07, 2021
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCB 2021 : International Conference on Cereal Biotechnology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Cereal Biotechnology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Cereal biotechnology
Genetic transformation of wheat and barley
Genetic transformation of rice and maize
Product development in cereal biotechnology
Using biotechnology to add value to cereals
Molecular biological tools in cereal breeding
Risk assessment and legislative issues
Current practice in milling and baking
Current practice in malting, brewing and distilling
Biotechnology of major cereals
Genetic transformation of maize

Sorghum genetic transformation
Wheat biotechnology
Rice genetic modification technology
Genome editing in cereals
Engineering cereal endosperm
Cereal genomics
Chemistry of cereal grains
Advances in cereal genomics and applications in crop breeding
Micropropagation in plants
Plant tissue culture and biotechnology
