

CALL FOR PAPERS

ICEBB 2021
Sep 06-07, 2021
Prague, Czechia

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICEBB 2021 : International Conference on Ecological Biotechnology and Biosystems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Ecological Biotechnology and Biosystems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Ecological biotechnology
Reduction of pollution from air and from aquatic or terrestrial systems
Ecological consequences of biodiversity and biotechnology
Ecological biotechnology for developing countries
Assessing ecological risks of biotechnology
Chemical biotechnology and bioengineering for ecological systems
Biodiversity and ecosystems function
Ecological restoration and management
Ecotoxicology and environmental safety
Ecological impact of toxic pollutants
Ecosystem bioscience and response to global changes
Microbiology and environmental ecology
Interaction between microbes, plants and sediments

Ecology and environmental health
Ecological remediation
Fate and transport of pollutants in the environment
Environment and sustainable development
Detection and monitoring
Detection and monitoring of pollutants
Detection and monitoring of microorganisms used for bioremediation
Detection and monitoring of ecological effects
Genetic engineering
Green sustainable manufacturing
Ecological biotechnology applications and implications
Advancement of small-scale agroecological farming
Analysis and control of microbial systems
