

# CALL FOR PAPERS

**ICCGCST 2021**  
**Sep 27-28, 2021**  
**San Francisco, USA**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCGCST 2021 : International Conference on Coastal Geomorphology and Coastal Sediment Transport is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Coastal Geomorphology and Coastal Sediment Transport. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

#### Coastal geomorphology

The coastal zone, coastal landforms and coastal processes  
Factors influencing coastal morphology and processes  
Wave action and longshore drift  
Atmospheric processes  
Biological processes  
Physical processes  
Sea level fluctuations and changes  
Astronomical tides  
Short-term dynamic changes in sea level  
Climate change and sea level rise

#### Land level changes

Coastal erosion interpretation  
Alternative sand sources  
Sediment ridge analysis  
Waves, wave theory and wave dynamics  
Wind-generated waves  
Surf zone circulation  
Beach and nearshore sediments and morphology  
Coastal sediment transport  
Beach and nearshore systems
