

CALL FOR PAPERS

ICDSASM 2021
Sep 09-10, 2021
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDSASM 2021 : International Conference on Defense Systems Analysis, Simulation and Modeling is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Defense Systems Analysis, Simulation and Modeling. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Defense analysis	Evaluating weapons systems
Trends in defense analysis	Scientific analysis and operations
Governmental and organizational policies and strategies	research in defense analysis
Improving defense and stabilization	Comparative defense policies
Defense modeling, simulation, and analysis	Defense intelligence
International relations and foreign policy	Defense management and command
Defense for national and international security	Defense procurement and sales
Defense strategy and military operations	Defense technology, research and development
Network analysis and science	Economics of defense
Cybersecurity and information security analysis	Formulation, simulation and prediction of defense issues
Defense analysis and strategic design	Historical patterns and trends concerning defense
Defense analysis and testing	Hypotheses, theories and critiques of defense, security and war
Defense intelligence analysis	Internal defense and low-intensity operations
	Medical and psychological dimensions of defense
