

# CALL FOR PAPERS

**ICMLDA 2021**  
**Sep 09-10, 2021**  
**Tokyo, Japan**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMLDA 2021 : International Conference on Machine Learning and Data Analysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Machine Learning and Data Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

association rules

Audio Mining

case-based reasoning and learning

classification and interpretation

of images, text, video

conceptual learning and

clustering

Goodness measures and evaluation

(e.g. false discovery rates)

inductive learning including

decision tree and rule induction

learning

knowledge extraction from text,

video, signals and images

mining gene data bases and

biological data bases

mining images, temporal-spatial

data, images from remote sensing

mining structural representations

such as log files, text documents

and HTML documents

mining text documents

organisational learning and

evolutional learning

probabilistic information

retrieval

Selection bias

Sampling methods

Selection with small samples

similarity measures and learning of

similarity

statistical learning and neural net

based learning

video mining

visualization and data mining

Applications of Clustering

Aspects of Data Mining

Applications in Medicine

Automatic Semantic Annotation of

Media Content

Bayesian Models and Methods
