

CALL FOR PAPERS

ICMPMMA 2021
Sep 09-10, 2021
Tokyo, Japan

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMPMMA 2021 : International Conference on Materials Physics, Modern Materials and Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Materials Physics, Modern Materials and Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Materials physics

Physical properties of materials
Basis for the development of new materials
New materials, nanotechnology and biomaterials
Solid state physics
Experimental physics of modern materials
Applications
Practical applications of materials
Physical syntheses of nanoscale and nanostructured materials

Microspectroscopies for imaging and characterization
Metamaterials
Physics and measurements of magnetic materials
Mechanical properties of solids
Basics of elasticity
Deformation experiments
Microscopic processes of plastic deformation
Hardening mechanisms
Brittle fracture
