

# CALL FOR PAPERS

**ICSAC 2021**  
**Sep 09-10, 2021**  
**Tokyo, Japan**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSAC 2021 : International Conference on Structural Analysis and Control is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Structural Analysis and Control. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Structural analysis  
Physical structures and components  
Physical tests  
Classification of structures  
Analysis of structures  
Moment distribution and slope  
deflection methods  
Matrix structural analysis  
Computer applications to analyze  
beams  
Frames and trusses  
Lateral loads on high-rise  
buildings

Structural systems for high-rise  
buildings  
International building codes  
Strength of materials methods  
Applied mechanics, materials  
science and applied mathematics  
Structure's deformations  
Internal forces  
Stresses  
Support reactions  
Accelerations  
Stability
