

CALL FOR PAPERS

ICACEOE 2021
Sep 20-21, 2021
Toronto, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICACEOE 2021 : International Conference on Advances in Civil, Environmental and Offshore Engineering is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Civil, Environmental and Offshore Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Civil Engineering	Damage, fracture and failure
Buckling	Durability of concrete structures
Civil and environmental engineering	Dynamic failure and fracture
Civil and structural engineering	Fiber reinforce of concrete
Civil engineering design	Fracture and failure of materials and structures
Civil engineering materials	Fracture of concrete
Coastal engineering and management	High-performance concrete
Computational technologies in concrete	Hydraulics and hydro-power engineering
Computing in civil engineering	Impact loads on concrete structures
Concrete bridges and buildings	Land and construction surveying
Concrete structures	Large deflections
Creep and shrinkage	Non-linear behaviors
Damage mechanics
