

CALL FOR PAPERS

ICCICET 2021
Sep 20-21, 2021
Toronto, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCICET 2021 : International Conference on Information and Control Engineering and Technologies is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Information and Control Engineering and Technologies. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Information and control
Control and information management
Control and information
integration
Control engineering and information
systems
Automation and control engineering
Industrial control and control
networks
Control technologies
Generalized model predictive
control

Intelligent control methods
Simulation of large networks on
smaller networks
Representations of graphs
Function definitions and
applicative programming
Systolic trellis automata
Stability, decidability and
complexity
Exponential and probabilistic
complexity classes
