

CALL FOR PAPERS

ICGNRM 2021
Sep 20-21, 2021
Toronto, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGNRM 2021 : International Conference on Geomatics in Natural Resource Management is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geomatics in Natural Resource Management. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Geomatics in natural resource monitoring
Spatial information in natural resource management
GIS in natural resource management
Remote sensing in natural resource management
Application of GIS data in forest management
Sampling for natural resource monitoring
Geoinformatics for natural resource management
Ecosystems and sustainable development
Satellite remote sensing and GIS
Geoinformatics for mapping and modeling of natural resources

Groundwater management planning
Systematic assessment of natural resources
Spatiotemporal dynamics of land use
Geo-information for sustainable development
Remote sensing techniques for geological mapping and exploration
Recent developments in measurement techniques
Land cover maps
Vegetation maps
Soil maps
Geology maps
