

CALL FOR PAPERS

ICMEPCD 2021
Sep 20-21, 2021
Toronto, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMEPCD 2021 : International Conference on Microfluidics Engineering for Point of Care Diagnostic is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Microfluidics Engineering for Point of Care Diagnostic. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Micro-fabrication, interface
between fluids and electronics and
advanced materials
Lab-on-Chip and Lab-on-CMOS-Chip
based devices
Microelectromechanical systems
(MEMS)-based structures
Detection, separation and
manipulation of bio-chemical
agents
Paper-based microfluidics

Image and signal processing in
bio-chip
Applications in
micro-acousto-fluidics
Applications in
micro-opto-fluidics
Complex flow in bio-microfluidics
