

CALL FOR PAPERS

ICWISBA 2021
Sep 20-21, 2021
Toronto, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWISBA 2021 : International Conference on Wearable and Implantable Sensors for Biomedical Applications is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Wearable and Implantable Sensors for Biomedical Applications. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Wearable biomedical sensors
Wearable biomedical sensors and systems
Design and implementation of wireless biomedical sensor networks
Wearable and implantable sensors for biomedical applications
Wearable sensor based big data analysis for smart health
Internet of things for biomedical applications

Wearable flexible sensors
Smart sensor systems for wearable electronic devices
Home monitoring technologies for biomedical health applications
Health and wellness monitoring
Safety and patient monitoring
