

CALL FOR PAPERS

ICGGM 2021
Sep 23-24, 2021
Vancouver, Canada

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGGM 2021 : International Conference on Geomodeling and Geologic Map is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geomodeling and Geologic Map. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Presentation of 3D Geomodeling and Mining Software
Geometallurgy
Geostatistics and Operations
Research in Stochastic Mine Planning
GeoMap: Regional Geochemistry
Mapping with Logratio Techniques
Mathematics of Oil Recovery
Mathematical Modelling and Numerical Simulation of Multiphase Flow and Multicomponent Reactive Transport in Porous Media
Medical Geology

Quantitative Models in Marine and Coastal Geosciences
Quantitative Approaches in Provenance Analysis
Quantification of Complex Rock Structures in 2D and 3D
Inverse Problems in the Geosciences
Directional Statistics
Machine Learning and Knowledge Discovery in the Geosciences
