

CALL FOR PAPERS

ICAPCE 2021
Oct 21-22, 2021
Athens, Greece

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAPCE 2021 : International Conference on Advances in Power Cable Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Power Cable Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Electrical power cable engineering
Electrical power cable engineering
and applications
Advances in electrical power cable
engineering
Metallic and nonmetallic cable
shields
Thermoplastic jacket materials
Design, application, and
preparation of cables
Electrical cables and conductors
Cable characteristics
Electrical properties of insulating
materials
Power cables and shielding

Sheaths, jackets, and armors
Cable standards and specifications
Cable manufacturing and
installation
Cable splicing, terminating, and
accessories
Ampacity of cables
Sheath bonding and grounding
Power cable testing in the field
Lightning protection of cable
systems
Cable performance
Concentric neutral corrosion
