

CALL FOR PAPERS

ICHCSMA 2021
Oct 21-22, 2021
Athens, Greece

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICHCSMA 2021 : International Conference on Hierarchical Control Systems, Modeling and Analysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Hierarchical Control Systems, Modeling and Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Hierarchical control systems
Hierarchical control theory
Optimization methods
Hybrid intelligent systems
Perceptual control theory
Robotic paradigms
Motion planning and computer-aided
production engineering
Hierarchical control systems
Applications of hierarchical
control systems
Hierarchical control systems,
current and common problems

Manufacturing, robotics and
vehicles
Artificial intelligence
Planning and scheduling
Information and production
scheduling
Area control
Computer control system
Lower level members
Unit control and supervision
Electric power distribution control
and supervision
