

# CALL FOR PAPERS

**ICMGP 2021**  
**Oct 25-26, 2021**  
**Bali, Indonesia**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMGP 2021 : International Conference on Map Generalization Procedures is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Map Generalization Procedures. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Map generalization  
Generalization of geographic information  
Map generalization methods  
Generalization algorithms  
Generalization procedures  
Selection and simplification  
Combination and smoothing  
Enhancement and displacement  
Exaggeration and aggregation  
GIS and automated generalization

Scaling law  
The representation-oriented view  
The process-oriented view  
The ladder-approach  
The star-approach  
Evaluation in the map generalization process  
Map generalization technology  
Automated generalization in a map production environment  
Generalization of geographical networks
