

# CALL FOR PAPERS

**ICDTSNAAAM 2021**  
**Oct 06-07, 2021**  
**Beijing, China**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICDTSNAAAM 2021 : International Conference on Design and Theoretical Study of New Antennas and Antenna Arrays Measurement is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Design and Theoretical Study of New Antennas and Antenna Arrays Measurement. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

New materials for antennas and millimetre-wave systems  
Wideband antennas  
Antenna arrays  
MIMO and smart antennas  
Active and integrated antennas

Adaptive and reconfigurable antennas  
Antennas/antenna arrays for energy harvesting and scavenging  
Antennas/antenna arrays measurement  
Advanced RF materials, meta-materials, metasurfaces and EBG  
Antennas/antenna arrays for 5G communications and the Internet of Things
