

# CALL FOR PAPERS

**ICAHNTP 2021**  
**Oct 28-29, 2021**  
**Paris, France**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAHNTP 2021 : International Conference on Ad Hoc Networks, Technologies and Protocols is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Ad Hoc Networks, Technologies and Protocols. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Ad hoc networks	Synchronization and scheduling issues
Mobile and wireless ad hoc networks	Mobility management
Sensor networks	Mobility-tolerant communication protocols
Wireless local and personal area networks	Location tracking and location-based services
Home networks	Resource and information management
Ad hoc networks of autonomous intelligent systems	Security and fault-tolerance issues
Novel architectures for ad hoc and sensor networks	Hardware and software platforms, systems, and testbeds
Self-organizing network architectures and protocols	Experimental and prototype results
Transport layer protocols	Quality-of-service issues
Routing protocols (unicast, multicast, geocast, etc.)	Cross-layer interactions
Media access control techniques	Scalability issues
Error control schemes	Performance analysis and simulation of protocols
Power-aware, low-power and energy-efficient designs
