

# CALL FOR PAPERS

**ICCSDA 2021**  
**Oct 07-08, 2021**  
**Tokyo, Japan**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCSDA 2021 : International Conference on Computational Statistics and Data Analysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computational Statistics and Data Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Advances in Mixture Models  
Analysis of Symbolic and Structured Data  
Applications in Macro-Economics, Finance and Marketing  
Association Rules  
Bayesian Computation methods  
Biostatistics and Bio-computing  
Business Intelligence  
Categorical Data Analysis  
Classification and Discrimination  
Clinical Trials  
Clustering  
Computational Bayesian Methods  
Computational Econometrics

Computational Methods for Industry  
Computational Methods in Official Statistics  
Computational Statistics in Finance  
Computational Statistics Teaching  
Computer-intensive methods for dependent data  
Data Analysis Techniques for Evaluating Trading Strategies  
Data assimilation and its application  
Data Mining  
Data Streams and Massive data  
Design of Experiments  
Dimensionality Reduction  
Econometrics and Statistical Finance  
Environmental Statistics and Climate Change
