

# CALL FOR PAPERS

**ICNDB 2021**  
**Nov 18-19, 2021**  
**London, United Kingdom**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNDB 2021 : International Conference on Nanozyme Design for Biosensing is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Nanozyme Design for Biosensing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Nanozymes in bionanotechnology  
Nanotechnology and enzyme engineering  
Nanozyme construction and production  
Design and synthesis of nanozymes  
Nanomaterials with enzyme-like characteristics  
Metal oxide-based nanozymes  
Metal-based nanozymes

Carbon-based nanozymes  
Nanozyme applications in biology and medicine  
Nanozymes for biosensing  
Nanozymes for antiviral therapy  
Recent research trends in nanozymes  
Future prospects in nanozymes
