

CALL FOR PAPERS

ICNNBCMS 2021
Nov 04-05, 2021
Cape Town, South Africa

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNNBCMS 2021 : International Conference on Neural Network-Based Control and Management Systems is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Neural Network-Based Control and Management Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Neural network-based control
Design of neural network-based control systems
Adaptive neural network based controller for robots
Neural network for complex systems
Neural networks in control engineering applications
Neural networks in process control
Neural network applications in control
Neural network architecture, and controls
Neural network architecture
Control space

Dataset selection and data types
Selecting target variable model input elements
Historical data and parametric testing
Neural network models and industrial processes.
Neural network models, measurement and control space
Data mining and data set for training
Motion control applications domains
Optimization or reinforcement
Complex engineering and control problems
Neural network modeling and connectionism
