

CALL FOR PAPERS

ICENFE 2021
Nov 18-19, 2021
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICENFE 2021 : International Conference on Emerging Nanotechnologies for Food Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Emerging Nanotechnologies for Food Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Emerging nanotechnologies in food science

Food nanotechnology

Nanotechnology for encapsulation

Nanotechnology for food safety/security

Nanotechnology in food processing and packaging

Polymer nanocomposites for food packaging

Nanomaterials in food, agricultural practices, nutrition

Nanotechnology for delivery of

natural and functional compounds

Safety and toxicology of nanofoods

Nanosensors for detection of food-borne pathogens

Analysis of nanomaterials in food

Recent trends in food

nanotechnology

Nanosafety and nanotoxicology

Future trends and challenges
