

CALL FOR PAPERS

ICNCPM 2021
Nov 11-12, 2021
Venice, Italy

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNCPM 2021 : International Conference on Network Congestion and Performance Management is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Network Congestion and Performance Management. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Network congestion	Current algorithms and resource allocation
Network capacity	The effects of congestion
Congestion control	Open-loop and close-loop congestion control techniques
Congestion control mechanisms	The leaky bucket algorithm
End-system flow control	The token bucket algorithm
Network congestion control	Admission control
Network-based congestion avoidance	Choke packets
Resource allocation	Weighted fair queuing
Theory of congestion control	Load shedding
Classification of congestion control algorithms	Resource reservation
Network congestion avoidance	Flow and congestion control
Distributed algorithms
