

CALL FOR PAPERS

ICAPE 2021
Dec 09-10, 2021
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICAPE 2021 : International Conference on Advances in Production Engineering is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Production Engineering. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Production engineering	Automation development
Industrial design and production engineering	Manufacturing systems
Production management and maintenance	CAD/CAM/CAE/CIM
Operation management and supply chain management	Automation of production
Innovations in production processes	Modeling and simulation in manufacturing engineering
Computer aided engineering for process chain and factory management	Production planning
Industrial design and design engineering	Rapid prototyping and additive manufacturing
Manufacturing innovations	Integrated development of products and processes
Materials science	Industrial quality and quality management
Interactive aerospace	Teaching and learning in manufacturing engineering
