

CALL FOR PAPERS

ICMLMCFFR 2021
Dec 09-10, 2021
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMLMCFFR 2021 : International Conference on Machine-Learning Methods for Complex Flows and Flow Reconstruction is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Machine-Learning Methods for Complex Flows and Flow Reconstruction. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Neural networks
Bayesian regression
Gaussian processes
Uncertainty quantification
Optimization
Flow reconstruction

Remote sensing
Structure identification
Dynamical systems
Modal decompositions
Sustainability
