

# CALL FOR PAPERS

**ICNFCAFCM 2021**  
**Dec 09-10, 2021**  
**New York, USA**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICNFCAFCM 2021 : International Conference on Nuclear Fuel Cycle Analysis and Fuel Cycle Models is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Nuclear Fuel Cycle Analysis and Fuel Cycle Models. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Nuclear fuel cycle analysis  
Systems analysis of the nuclear fuel cycle  
Sustainability features of nuclear fuel cycle options  
Nuclear fuel cycle optimization  
Methods and modelling techniques  
Sensitivity analysis and optimization of the nuclear fuel cycle  
Uranium supply and demand

Basic model of the LWR fuel cycle  
Resolution of uncertainties  
Assessment of proliferation risks  
Multigoal optimization  
Fuel cycle models  
Reactor strategy calculations  
Power plant and fuel cycle cost data base
