

CALL FOR PAPERS

ICSMPBA 2021
Dec 09-10, 2021
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSMPBA 2021 : International Conference on Software Measurement and Property-Based Approaches is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Software Measurement and Property-Based Approaches. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Software measurement	Property-based approaches
Software metrics	Requirements
Theoretical validation	Practical application of measurement
Empirical validation	Process mapping
Software measurement process	Metrics in project estimation
Goal question metric	Cost estimation
Goal-oriented measurement	Decomposition
Entities and attributes	Effort estimates
Representational measurement theory	Expert judgement
Empirical relational system	Estimation by analogy
Numerical relational system	Cost estimation tools
Scale types	Software quality measurement
Objective vs. Subjective measures	Software complexity measurement
