

CALL FOR PAPERS

ICWCG 2021
Dec 02-03, 2021
Amsterdam, The Netherlands

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICWCG 2021 : International Conference on Wildlife and Conservation Genetics is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Wildlife and Conservation Genetics. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Wildlife conservation genetics
Molecular markers in conservation
Primer in population genetics
Species identification
Genetic monitoring
Genetic diversity and habitat fragmentation
Genetic variation, measuring variation, and the relation to fitness and life histories

Dynamics of genetic variation in small populations
Inbreeding depression and extinction
Genetic management of captive and wild populations
Captive breeding and re-introduction
Measuring biodiversity and defining management units
Preserving biodiversity
Ethical issues and conservation policies
