

CALL FOR PAPERS

ICESADP 2021
Dec 01-02, 2021
Auckland, New Zealand

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICESADP 2021 : International Conference on Electromyogram Signal Analysis, Detection and Processing is

the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Electromyogram Signal Analysis, Detection and Processing. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Analysis of Electromyogram (EMG)
for Detection of Neuromuscular
Disorders
Electrodiagnostic instrumentation
Navigated brain stimulation
Electrodiagnostic Medicine
Instrumentation Pitfalls:
Interelectrode separation and
filters
Motor and sensory nerve conduction

Motor nerve conduction studies
The EMG signal simulator
Paired pulse transcranial magnetic
stimulation (TMS) methods
Nerve Conduction Studies
Motor unit potentials
Needle EMG
