

CALL FOR PAPERS

ICSSCT 2021
Dec 09-10, 2021
London, United Kingdom

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICSSCT 2021 : International Conference on Space Science and Communication Technology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Space Science and Communication Technology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Atmospheric Sciences
Space weather
Upper atmosphere
Lower atmosphere
Pollution and climate change
Astrophysics and Astronomy
Cosmology
Studies in the solar system
Space exploration and astronautics
Observational astronomy and instrumentation
Computational and statistical methods
Remote Sensing

Remote sensing applications
Environmental sciences
Geographic information system & cartography
Satellite and Communication Technology
Antenna for space communication
Wireless communications via satellite
Satellite networks and networking
Satellite navigation and positioning systems
Satellite communication and broadcast systems
Telemedicine and e-health using satellite technology
Satellite control systems
