

# CALL FOR PAPERS

**ICASLM 2021**  
**Dec 09-10, 2021**  
**New York, USA**

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICASLM 2021 : International Conference on Advances in Selective Laser Melting is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Advances in Selective Laser Melting. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Alloy design for selective laser melting

Novel materials processing including functionally graded materials, amorphous materials, quasicrystalline materials, high entropy alloys, etc.

Parameter optimization

Microstructural characterization

Microstructure-property correlations

Process simulations and properties simulation

Topological optimization

Process development

4D selective laser melting process

Applications
