

CALL FOR PAPERS

ICASSS 2021
Dec 09-10, 2021
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICASSS 2021 : International Conference on Aviation Safety and Security Systems is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Aviation Safety and Security Systems. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Aviation security

The future of aviation security

Flight safety and aviation security

Safety control systems and technologies

Monitoring and detection systems

Security research and aviation security

Aviation security policies and problems

Screening individuals and their hand baggage

Screening cargo and hold baggage

Ethical considerations, codes and standards in aviation security

Airport operations and quality control

Air traffic service

Security measures

Aviation security regulations

Flight safety and safety control

Human factors in maintenance

Maintenance errors and mitigating strategies

Fatigue risk management for maintenance

Quality control in maintenance

Maintenance training issues

Safety leadership in maintenance

Transition to electronic records

Authenticity of electronic records

3d printing in aviation

Repair of composite materials

Quality and safety management systems
