

CALL FOR PAPERS

ICCBB 2021
Dec 09-10, 2021
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICCBB 2021 : International Conference on Computational Biotechnology and Biology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Computational Biotechnology and Biology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Computational biotechnology
Computational biotechnology and genomic medicine
Computational methods in biotechnological applications
Bioinformatics and biotechnology
Computational bioengineering and biotechnology
Experimental methods for models validation
Information technology applications to computational biotechnology
Data management and modelling tools in biotechnology
Probabilistic and optimization methods in biotechnology

Nanoparticles, nanocomposites and nanoporous materials for bio-applications
Synthetic biology and applied biology
Microbiology and molecular biology
Biomolecular engineering
Biocatalysis and biotransformation, and metabolic engineering
Bioseparation, bioprocess control and system engineering
Nanobiotechnology, biosensor and bioelectronics, cell culture engineering
Environmental biotechnology
Food biotechnology
