

CALL FOR PAPERS

ICGDM 2021
Dec 09-10, 2021
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICGDM 2021 : International Conference on Geomatics in Disaster Management is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Geomatics in Disaster Management. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Disaster informatics and geomatics
Geomatics for disaster management
GIS and remote sensing in disaster management
Crisis informatics
High resolution satellite imagery in disaster management
Settlement vulnerability mapping

Open source geographic information system
Advantages of open source GIS in disaster management
Information management
Effective disaster risk reduction
Disasters and emergency response
