

CALL FOR PAPERS

ICHM 2021
Dec 09-10, 2021
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICHM 2021 : International Conference on Hydrology and Meteorology is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Hydrology and Meteorology. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Hydrometeorology
Meteorology and hydrology
Hydrometeorological hazards
Changes in climatic and hydrological extremes
Hydrometeorologic models and simulations
Dynamical behaviour of hydrological systems
Predictability of the water cycle processes

Predictable and unpredictable patterns
Limits of predictability of the hydrometeorologic patterns
Hydrological systems
Natural hazards of hydrometeorological origin
Mitigation of hydrometeorological hazards
Floods, tropical cyclones, drought and desertification
Forecasting, warning and informing the public of hydrometeorological hazards
