

CALL FOR PAPERS

ICHRBD 2021
Dec 09-10, 2021
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICHRBD 2021 : International Conference on High-Rise Buildings and Design is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of High-Rise Buildings and Design. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

High-rise buildings
Anatomy of high-rise buildings
Structural analysis and design of tall buildings
High-rise building structures
High-rise structural systems
Structural analysis of regular multi-storey buildings
Seismic design of multi-storey buildings
Architectural design
Structural design
Possibilities of the building system

Principles of building acoustics
Principles of fire design
Principles of controlling deformations and cracking
Principles of seismic design
Frame element production information
Environmental impacts of multi-storey buildings using different construction materials
Structural fire design of multi-storey buildings
Applications
Innovative seismic solutions for multi-storey buildings
