

CALL FOR PAPERS

ICMMA 2021
Dec 09-10, 2021
New York, USA

The International Research Conference is a federated organization dedicated to bringing together a significant number of diverse scholarly events for presentation within the conference program. Events will run over a span of time during the conference depending on the number and length of the presentations.

ICMMA 2021 : International Conference on Mathematical Modeling and Analysis is the premier interdisciplinary forum for the presentation of new advances and research results in the fields of Mathematical Modeling and Analysis. The conference will bring together leading academic scientists, researchers and scholars in the domain of interest from around the world. Topics of interest for submission include, but are not limited to:

Mathematical modeling	Conservation and balance principles
Applied mathematical modeling	Constructing linear models
Mathematical modeling and the scientific method	Dimensionless form
Mathematical modeling and the practice of engineering	Asymptotic behavior
Systems analysis and mathematical equations	Sensitivity analysis
Principles of mathematical modeling	Modeling model output
Methods of mathematical modeling	Using mathematical models
Dimensional homogeneity and consistency	Predictions with estimates of precision
Abstraction and scaling	Decision support
